

ZY82M-SC SLEEVES

The “ZY82M-SC Sleeves” are a textiles manufactured studied and made for the Glass Industry.

The ZY82M-SC Sleeves are produced with 100% PBO virgin carded yarn (ZYLON Spun Yarn of TOYOBO Co.); they are used for to cover completely the furnace’s steel rolls, for avoid the soft glass sheets. These Sleeves are produced with a Knitting Machine and their aspect is like a socks; with this technology we can produce Sleeves with inside diameters very high (until 500 mm.).

The ZY82M-SC Sleeve is elastic (like a sock) and his surface is very homogeneous and regular.

TECHNICAL AND SUPPLY DATA

Raw material	100% virgin PBO fibre
Kind of yarn	Spun yarn
Inside diameters	from mm. 20 to mm. 500
Wall thickness	From mm. 0,6 to mm. 1,2
Colour	Brown
Construction	Jersey (Knitted)
Package	rolls
Working temperature	450 °C (500 °C tips)
